

your fairground!

save and open models you have created for changing and printing at a later date

easy to follow, step-by-step printing gives the choice of printing out the whole of your model or just a single part, in either decorated or outline form and with or without assembly instructions.

the import function allows you to import additional models, textures and stickers that have been downloaded from the Print & Go Website

a direct link to the Print & Go Website gives you instant access to additional Model It! downloads, FAQs and product information

*user login and password is required to download additional Model It! features.

choose which model you would like to create from one of the many templates on the CD

drag and drop textures and colours let you create different designs every time

drag and drop digital stickers let you customise your model

3-D preview allows you to rotate your model and view it from all angles
