

Maintenance-Free Vinyl Fence

TRIPLE
CROWN[®]
FENCE

Discover the Advantages

The Triple Crown Fence system offers a unique solution for complete peace of mind, whether for a riding arena, paddock or residential location.

Any fencing is a sizeable investment but a **Triple Crown Fence[®]** will cost less of your money and time to maintain through the years.

- Maintenance-free
- Safe
- Strong
- Will not rot or discolour
- Easy to install
- Deters cribbing
- White or Light Brown

Ideal for Arenas

We offer a full consultation and installation service for any project you have in mind.

DIY is also a popular option with clear step-by-step instructions and full technical backup for ordering and installing.

Proven Design

Pre-punched posts allow rail installation without hardware or tools safely and rapidly

Safety and strength come first in every area of our patented fence design.

Safer for your horse: Risk of injury is greatly reduced by rails flexing instead of breaking to absorb heavy pressure. This extra strength, flexibility and impact resistance is due to reinforcement ribs within the rail. Under extreme stress, the rail lock will release the rail, providing additional protection in dangerous situations.

No nails or screws: Smooth surfaces, rounded corners and no protruding nails or screws provides further safety.

Quick & easy installation: No fiddly nails, screws or brackets are required as the rapid 'push-fit' action of the rail lock eliminates normal tedious fence installation work and speeds up the job tremendously. Posts are set 36" into the ground and line posts usually do not usually need to be set in concrete (depending on ground conditions).

The patented rail lock design

Lasting Finish

Over 15 years of use worldwide has shown that **Triple Crown Fence®** maintains its durability and structural integrity in all climates.

Maintenance-free savings: Save time and money as painting or treating your fence becomes a thing of the past. The UV-stabilized vinyl is guaranteed for 20 years not to discolour or 'weather' over time*.

Discourage cribbing: Horses will not 'crib' or chew on the completely tasteless tough smooth vinyl surface.

Quality Components: Only the highest quality raw materials are used to produce **Triple Crown Fence®**. Stringent quality control during the manufacturing process ensures your fence is impervious to the effects of moisture, temperature extremes, sunlight...and time itself!

The Georgia International Horse Park, site of the 1998 Equestrian Olympics

"..... We chose Triple Crown Fence® as a long term investment, taking into account big savings in future maintenance and repair costs. We have not had any problems whatsoever since installing it a couple of years ago and it is completely safe, requires virtually no maintenance and looks superb."

Edward Brook, Manager
Patchetts Equestrian Centre, Herts

Be assured that when you choose Triple Crown Fence®, you've chosen the best.
